

OCEAN CURRENTS

AUTUMN · SEPTEMBER – NOVEMBER

SURFACE CIRCULATION OF THE WORLD OCEAN

— warm current — cold current — surface flow, weaker → stronger

sea surface temperature

-2° 10° 20° 30 °C

Flow lines are traced through a field interpolated from the drawn current paths — a picture of the circulation, not measured velocity. Temperature: NOAA ERSST v5, 1991-2020, 90 monthly fields. northern autumn, southern spring. Coastlines: Natural Earth 1:50m.
